MEBO® GASTROINTESTINAL CAPSULE

The only product solving various
gastrointestinal problems

Decode gastrointestinal regeneration code

General Population	Take orally twice a day, 5 capsules each time and 1 hour before or after meal; you may swallow 5 capsules 30 minutes before sleep (additional)		
	When gastrointestinal reactions occur after seasickness, carsickness and airsickness, you may chew up 3-5 capsules immediately		
	You may smear capsules contents to perianal area to relieve the perianal area causalgia caused by eating irritating food		
	You may chew up 3-5 capsules to relieve toothache		
	When you have a dry throat, you may chew up 3-5 capsules and the pain of dry throat will be relieved		
	You may chew up 1-3 capsules immediately for esophagus scald caused by eating overheat food. 3 days of usage could repair the damaged mucous.		
	Taking 5 capsules before drinking could protect gastrointestinal mucosa, reduce gastrointestinal absorption of alcohol and reduce liver damage		
	For people smoking heavily and long-term, taking 5 capsules regularly could reduce the damage of nicotine to gastrointestinal mucosa		
	For people taking Chinese and western medicines for long term, they could take orally 5 capsules together with other medicines to effectively protect gastrointestinal mucosa from corrosion of medicines		
	Sub-healthy Population	General constipation population and intermittent constipation population	Take 5-10 capsules 30 minutes before breakfast, lunch and dinner
Gastrointestinal functional disorder		People who have colic due to improper diet	Swallow 5 capsules
		People who have abdominal distension	
		People who have acid regurgitation	Chew up 5 capsules
		People who have nausea	
		People who have vomit	
		People who have heartburn	
Chronic Disease Population (Digestive System)	Upper digestive tract disease	Oral mucositis	Chew up 5 capsules 30 minutes before meals, 3-4 times each day. It's suggested to reduce 1-3 capsules when taking it for the first time. Recover normal dosage after 3 days.
		Oral ulcer	
		Acute and chronic pharyngitis	
		Reflux esophagitis	
		Esophageal achalasia	
		Cardia achalasia	
	Lower digestive tract disease	Ulcerative colitis	Once every 6 hours and 10 capsules each time. Swallow up 1 hour after meals
		Gastric ulcer	Chew up 5 capsules every 6 hours, take before meals
		Duodenal ulcer	Take 5 capsules every 4 hours
		Chronic superficial gastritis	Take over 30 minutes before meals, 4 times each day and 5 capsules each time
		Acute hemorrhagic gastritis	
		Chronic erosive hemorrhagic gastritis	
		Chronic atrophic gastritis	
The treatment cycle of the above is half a year; for people who suffer from digestive system hemorrhagic, erosive and ulcerative diseases and from radiation therapy and chemotherapy due to cancers, they may consult medical experts first.

MEBO REGENERATIVE RECOVERY SCIENCE

Adopted into American Development National Policy in 2013

Improve body health condition from source cellular aspect of life

Enter into the Era of Cell Regeneration Technology

Launch the reform of gastrointestinal function regeneration

The core technology of Regenerative Recovery Science is launching regenerative potential of body's own cells. By in situ regenerating new cells, recover acquired defects, advanced aging, mutation, serious diseases and other problems of tissues and organs.

Obama meets with MEBO U.S President Xu Peng

Clinton meets with MEBO U.S President Xu Peng

MEBO U.S FDA Development Policy Decision Conference is held in Phoenix, Arizona State, U.S

MEBO Regenerative Recovery Technology Creates Life Miracles

Significant Practice and Technological Achievements of Body Regenerative Recovery Science

President of Anthony bucco Mr. Gaynor

Former Standing Member of Political Bureau of the Central Committee of the CPC, Head of Organization Department and founding fathers of PRC Song Ping

Elite of Wall Street Capital Industry Gai Xiaoxia

Founder of "Shang-wutong" Zhang Zhengyu

Prominent Leading Media Worker Xia Chunping

Prominent Leading Media Worker Zhai Huisheng

Former Deputy Director of State-owned Assets Supervision and Administration Commission Wang Ruixiang

Leader of National "Twelfth five-year" Technology Planning Division Ma Junru

Former Head of Food Safety Authority of Ministry of Health Zhao Tonggang

Former Commissioner General of Ministry of Public Security Gu Linfang

Initiate New System of Body Regenerative Recovery Science

Great Pioneering Work of Life Science- in situ Regeneration

Regeneration of severed finger! Pioneering work of body tissue regeneration
Nerve tissue regeneration! Bone regeneration! Fingerprint regeneration!

First regeneration of severed finger

Secondary regeneration of severed finger

Miraculously achieve regeneration of severed finger by awakening potential regenerative cells in body histocytes.

Occurrence rate of in situ regenerative recovery of gastrointestinal regenerative mucosa reaches 100%

Witness miraculous intestinal villus regeneration; recover the aged stomach and intestine back to what they are in 25 years old

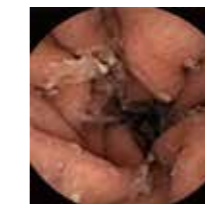

The natural aged intestinal villus is sparse and short

Regenerative technology restores dense and thick young intestinal villus

Young stomach at one's 25 years old

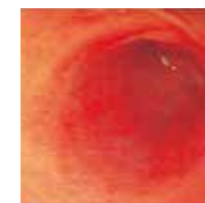

Stomach at one's 60 years old after regeneration recovery

Body in situ Stem Cell, Clinical Validation of Gastrointestinal Mucosa Regeneration

Angular notch ulcer

The ulcer is healed without scars after one-month clinical test

Radioactive gastric ulcer and erosive gastritis are not healed after taking Western medicines for 9 months

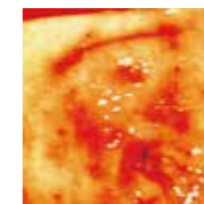

The ulcer is healed without scars after one-month clinical test

Duodenal ulcer

The ulcer is healed without scars after one-month clinical test

For people who drink white wine 100ml each day, mucous of gastric antrum can be seen through gastroscop to be red, congestive and erosive

Under the same condition, people who take 5 MEBO Gastrointestinal capsules before drinking do not show evident damages through gastroscopy

MEBO[®] GASTROINTESTINAL CAPSULE

A Functional health food approved by China Food and Drug Administration

American FDA approved body surface regenerative substance
The only technology enters into phase III clinical trial program

The only product which have 43 patent technologies in the world

China Patent No.: ZL02105541.6

America Patent: US 6,685,971. B2

Europe Patent: 1439847

Canada Patent: 2,464,152

Japan Patent: 2003- 539703

China Invention Patent: (State Intellectual Property Office of the P.R.C www.sipo.gov.cn)

- Compound that repairs and improves gastrointestinal mucosa tissue regeneration and its preparation method
- Potential regenerative cell and culture method
- Drug carrier and its preparation method
- Culture method of in vitro cell
- 2013 Significant Chinese Invention Patent - Potential regenerative cell and its culture method

America Invention Patent: (United States Patent and Trademark Office <http://patft.uspto.gov>)

- The method of preventing mucous ulcer and stimulation
- Composition and method that repair and promote mucous tissue regeneration in digestive tract
- Regenerate and restore tissues and organs by culturing in situ stem cell in human body
- Composition and method of body tissue recovery and regeneration
- Method of curing and preventing gastrointestinal cancer
- 2011 Significant American Invention Patent

(Composition and method used to cure or prevent gastrointestinal cancer)

The only product overcoming curing problems of intractable gastrointestinal diseases in the world

New pathway of regeneration field that saves human stomach and intestine
